

WESCO Sales Group, Inc covers the PAC NW with a list of world-class technical manufacturers focused on signal integrity, filtering and EMI/RFI solutions. These solutions focus on problems found at the seam and/or aperture of the enclosure down to the printed circuit board level. If electronic noise, cross talk, attenuation of signals, radiated emissions and susceptibility are some of your concerns, we have the broadest technical product breadth in the industry, coupled with deep, comprehensive engineering skill set to streamline the design, obtain agency compliance and get you to production.
